Artificial Intelligence & PowerPoint Template Science PowerPoint Templates do not have to be boring. Just look at this cool and modern science and technology PPT. This template includes: 34 unique slides of resizable and editable charts based on master slides widescreen aspect ratio 16:9 How to quickly create a high-tech PowerPoint presentation You have found the perfect technical presentation template. Now it's time to create a high-tech PowerPoint presentation. I'm using the React PowerPoint template for this quick walk. It has a clean and elegant layout. It also comes with a total of 30 slides that are based on the slide master so you can easily edit them. This presentation is a perfect example of the great science of ppt templateStep 1. Decide which slides to use, as mentioned earlier, the React PowerPoint template comes with different slides. If you're using a similar presentation technology template, you'll have several slides to present your services. There is no need to use all the slides in the template, so the first thing you need to do is decide which slides you will use. Step 2. Edit the contents of each Slide After layout to select the slides you want edit demo content. Replacing text is as easy as clicking a slide, selecting demo text, and entering your own text. In the Information section, I selected all the text #2 the Slide section. As soon as I start writing, it will be replaced by the information I type. Simply repeat this process for all slides that you plan to use. Customize the contents of the Slide response. TemplateStep 3. Customize fonts After you enter all the contents of your presentation, you need to customize the fonts. To change fonts, select the text. Then select a different font from the drop-down menu on the ribbon, as I did on the second slide in the Information section. To change all fonts at once, select a different font theme from the Design tab by clicking the second tab. Customize fonts in the RespondStep 4 template. Customize colors Finally, customize the colors in your presentation template to match the colors of the brand. Click the element that uses the color. Then select a different color from the right sidebar. Or, click the Design tab and choose a different color theme from the first drop-down menu. The second option allows you to quickly change all colors at once. Customize colors in reactstep 5. Adding a picture The best way to complete a slide is to add the picture to the placeholder. Remember that your envato elements subscription also unlocks photos of actions that you can use. One of my favorite things about this slide in React is the pre-built image placeholder. It is in its own mask shape, which transforms the standard image shape into its own. Just click the placeholder, and then go to the picture. An abstract image, like my example, is flexible enough for any presentation. Image added to custom mask in ReactWhat makes a great technical presentation? (5 PowerPoint Technology Presentation Ideas) You've seen our PowerPoint templates for scientific and technical presentation. Now let's talk about what makes a great technical presentation. After all, a high-tech PPT template is just part of the presentation. He should serve as an adviser rather than a major attraction. 1. Customize the theme to the audience first, be sure to customize the theme to the audience. If your audience is not familiar with industry jargon, avoid using it. In addition, prepare a keyword dictionary so that your audience can follow along. But if you are giving a presentation to a room full of your peers and colleagues, then the use of jargon should not matter. 2. Visuals Help explain complex and abstract thoughts Remember that most people tend to remember information better if there is a visual representation of the idea. Charts, charts, and even photos help your audience remember your slide show. They will also be easier to explain complex and abstract ideas. Tech Multipurpose PowerPoint template3. You'll need to use different PowerPoint slide layouts throughout your presentation different concepts. This may include data, key stakeholders and others. Using different slide layouts helps your audience distinguish between different concepts. Also, it will make your presentation more engaging. TechYou PowerPoint4 template. Provide enough background information to context matters and make it easier to follow along. Make sure your presentation has enough background information to help your audience. For example, the problem you were working on led you to come up with a solution. And that's the theme of your presentation now. PowerPoint IT5 support concept. Practice and then practice some more Don't forget to practice the presentation and then practice some more. This helps you remember your presentation and slide content. Plus, it will increase your confidence before the big day. 5 Top Creative Tips for Using PPT Templates Efficiently for Science and Technology When you're doing a science and technology presentation, you want to be at the cutting edge. After all, a presentation about technology that does not use the latest technology is bound to conquer. Here are some tips to make your presentation more high-tech: 1. Animate your slides Many of the technology and science PowerPoint templates we mentioned have built-in animations. If your high-tech PPT template doesn't provide this option, you can do it yourself. 2. Embed Video Speaking of video, your audience even more by adding videos to your images. The easiest way is to embed a YouTube video, although you can also embed your own video in your slide. Make sure the video is relevant to your topic and doesn't go away for too long, or you run the risk of your audience sleeping. 3. Do not overlook your charts Do not take charts for granted. First, use them instead of tables and lists of statistics. And when you use your charts, break out of traditional (boring) line charts and bar charts. Most of the technology or science PowerPoint templates we mentioned provide creative charts. This means that all you have to do is enter the data and the charts will be updated automatically. If your presentation template provides animated charts, use them. Or animate the charts yourself. 4. Add movement with GIF GIF can be described as an animated image. It's a video clip that loops or automatically plays over and over again and doesn't have sound. Find free and paid GIFs online, or create your own and insert them into a PowerPoint slide. As with animations and videos, use GIFs sparingly and only if you reinforce your message. 5. Use Voice-Over Storytelling With voice-over storytelling can only be a thing to bump your audience's attention. Use PowerPoint to record a custom nasa comment that syncs to slides. For example, if my slide has pictures of people, why not add your voices to the slide? It doesn't have to be that way. If you follow some of our design trends for 2020/2021, your technology presentation will surprise your audience. Here are some design trends to watch: 1. Use Mock-Ups in your presentation This 2020/2021 design trend is useful for science and technology PPT presentations. The maketa comes in handy when you need to visualize a product that will be developed in the future or does not yet exist. For example, if you're developing new software or an app, this template can be very useful. This technical PPT template from Envato Elements is useful and customizable2. Minimalist presentations are trends Minimalist design means that the images will not be distracting or unnecessary elements. Especially in PPT technical templates and presentations, you want your audience to focus. Why don't you know our simple and minimalist templates to inspire you? 3. Add icons in your Slides Icons are on trend this year because they're a great way to add energy and simplicity to your science presentation template, including icons can help you reduce text boxes. In addition, the icons are meaningful and versatile. They are effective tools because they reduce some concepts to simple shapes. This template is a great choice if you want to add some cool icons to your presentation. Check out this versatile science PPT template from Envato Elements 4. Go to your own font Do not use fonts that we all know. The big design trend this year is to use custom font in your scientific and technological presentation of PPT. And we have you covered by our selection of best selling fonts 2020/2021. If you're not sure how to add custom fonts to PowerPoint, here's a handy tutorial: Microsoft PowerPoint How to add custom fonts to PowerPoint in 60 seconds andrew childress 5. Select a gradient background The gradient color is a very cool trend in presentation design. One year it will catch the attention of your audience. This trend is highly effective because it is versatile and gives your presentation a unique feel. Whether you decide to be bold or gentle, gradients will always look different and modern. This template is fully editable. Choose the colors that best fit your presentation. Find more great PowerPoint templates for 2020/2021. I showed you how to customize one of our premium PPT science and technology templates. Now let me share some of my favorite PowerPoint templates from our collections: Microsoft PowerPoint 35 Cool PowerPoint Templates (Amazing PPTs Slides for Presentations 2020) Laura Spencer Microsoft PowerPoint 32 + Professional PowerPoint Templates: For Better Business PPT Presentations 2020 Sean Hodge Presentations 30 Marketing PowerPoint Templates: Best PPTs to Present Your Plans in Sean Hodge's Benefits of Using Top High-Tech PowerPoint Presentation Templates (in 2020/2021) Are you still wondering why you should use high-tech PowerPoint templates? Here are several advantages that come with using templates. Here are five reasons why you should use a PowerPoint presentation template for a technical presentation: It saves you time. The biggest advantage of using a pre-created template is that you don't have to waste time creating each slide from scratch. The layout is already created so that all you have to do is add it to the content. Your sliding deck will have a professional look and feel. The slide is using a slide show, but it should still look good. You may be a tech guide, but that doesn't mean design is your second nature. Don't try to do everything. Focus on what you do best. Leave the design to the professionals. The template comes with all the possible slides you'll need. It can even help you include images you might not have thought about otherwise, such as a call-to-action slide. Your presentation will be more memorable. Instead of boring or bland images, your audience will enjoy a polished presentation. Finally, customize each aspect of the presentation template. From fonts to colors and images, you're limited only by your imagination. Advantages of Envato Elements (The Power of Unlimited Use) When it comes to finding great high-tech PowerPoint templates, Envato Elements is hard to beat. It offers tons of great PPT templates for science and technology in a flat-rate subscription. Envato Elements: one flat rate, tons of scientific presentation templates. Sign up for envato elements. You will have access to thousands of unlimited use of graphics and templates. From web themes to scientific presentation templates and more—all for one low price. Common PowerPoint Questions Answered (FAQ) We've explored some amazing tips, trends, and ideas for your next PPT presentation on science and technology. Now let's go through some of the most common information about PowerPoint and presentations: 1. Can I get PowerPoint for free? Microsoft Office for free? Microsoft Office comes in many versions. And yes, one of them is free: Office 365. This is a subscription-based model for using Office applications with a monthly or annual suite. If you continue to pay for Office 365, you'll always have access to the latest version of Office applications. Office Home. A Home edition is one office purchase without a subscription attached. However, your app won't stay up to date because Microsoft is releasing new versions and features. Office Online. Start PowerPoint in your web browser. No matter which version of PowerPoint you're using, you can pair it for free with your browser-based version of the app. 2. Can I insert a PDF into my presentation? In science and technology, it is not uncommon to work with and receive PDFs. Whether it's a research paper, academic paper or special report, you may need to put presentation. Don't worry about re-making a presentation from scratch, or Screenshots. In this tutorial we will show you exactly how to convert PDF to PPT files. 3. What is the correct size for my images? Sometimes images may appear cut off at the edges or screen-blocked. To avoid this, you need to know the size and aspect ratio of your presentation slides. First, you need to know what device your presentation will appear on: iPad and tablet projectors on laptop screens, large-format displays Each of these displays has a different aspect ratio that describes the width and height of your screen. For more information, see: Microsoft PowerPoint What are the correct dimensions (size) for PowerPoint PPT slides? Andrew Childress 4. Should I use the presentation overview? One of the best things we can suggest to you is to write an overview of your presentation. Whatever the topic, the overview helps you turn your project into tasks that are easy to conquer. While this may seem like the next step, we guarantee that it will save you time in the long run. The advantage of using the outline is that your presentation will be more cohesive, and each point fell naturally into place. For more details, see our guide: Microsoft PowerPoint How to quickly write powerful PowerPoint presentations with Outlines by Andrew Childress 5. Why is a copy important? The copy you are writing for your presentation is an important element. It has to be as interesting as the design. This should be concise and help you successfully explain your topic to your audience. Some good tips are: use clear sentences, presentation benefits as well as facts. Do not forget the call to action at the end. Learn more about using PowerPoint (Envato Tuts+ tutorials) No matter how much you know about PowerPoint, there's always a lot to learn. Everything you learn helps you work more efficiently in the app. It pays dividends while taking its time to prepare for the presentation. We have launched an educational resource called How to Use PowerPoint (Ultimate Tutorial Guide.) No other collection offers such a deep library of tutorials to master PowerPoint. Here are three tutorials in the guide that you can use to start learning: Microsoft PowerPoint How to Make & Give Great PowerPoint Presentations (in 5 Easy Steps) Andrew Childress Microsoft PowerPoint How to Make PPT Slide Layouts in Microsoft PowerPoint Andrew Childress Microsoft PowerPoint How to Make Great PPT Charts & Charts in Microsoft PowerPoint Andrew Childress Get This eBook to Produce Great Presentations (Free Download) Learn the Best Presentation Strategies in Our eBook: Complete guide to creating great presentations (grab it now for free).
